

July 2, 2020

Governor Kemp:

We write you today as over 1400 Georgia healthcare workers who are concerned about our state's response to COVID-19. As we face, once again, an increasing number of cases of COVID-19 in the state of Georgia, we must act swiftly to avoid a potential critical shortage of hospital beds and ensure the safety of the citizens of Georgia.

During the past week we have seen a sharp spike in cases that cannot be accounted for by increased testing. We also are seeing a very troubling increase in hospitalizations that, if continuing, will overwhelm our healthcare infrastructure, not only in metro Atlanta but also in rural Georgia. Meanwhile, while testing has been scaled up, we still do not have the access to enough testing, and contact tracing is in its infancy. Georgia is simply not prepared for a surge in cases and hospitalizations. You have the power to do much more to save lives and protect our citizens from avoidable illness.

We must now reassess our re-opening schedule and consider what has worked well and what is not working. The Governors of Texas and Florida, for example, have recently decided to halt the re-opening of bars. It is our recommendation that the state of Georgia take steps to increase social distancing by **closing bars and nightclubs, and prohibiting indoor gatherings of more than 25 people, including at houses of worship**. This is especially crucial in advance of the Fourth of July holiday weekend. Businesses that can operate through telecommuting should continue to do so. Those businesses that must maintain onsite staff should make sure that their employees can remain 6 feet apart and consider further reducing the number of staff present within buildings. If we do not take these steps now this will result in a continued increase in hospitalizations and ultimately deaths.

The science is now clear that face coverings are critical for the control of COVID-19.<sup>1,2,3</sup> **We recommend a statewide face covering requirement** similar to that in North Carolina. We are encouraged to see you and your staff leading by example, wearing a mask whenever you are in public. You also should take time to speak candidly and directly to citizens about the challenges of wearing face coverings but convey the importance of behaving at all times as if we are potentially contagious. Reiterate that we don't wear a face covering only to protect ourselves but also to protect others. Offer options such as a face shield for those who cannot tolerate a face mask. Our goal should be having nearly 100% of our population wearing a face covering in public when we are indoors or when we are outdoors and cannot maintain 6 feet between ourselves and others.

Finally, we ask that you immediately **empower mayors and county officials around the state** to institute requirements that are appropriate for their jurisdictions. Georgia has many local epidemics across the state, and citizens deserve that their elected officials have the freedom to respond appropriately to safeguard their health. Savannah alone has had to close a dozen establishments because of COVID-19 infections. The Savannah mayor has just implemented a face covering requirement, an action that you should support. It is increasingly important that mayors and others have the tools they need not only to manage, but to avoid, community transmission and outbreak clusters.

We must act now knowing that these actions will have immediate impact, although it may take weeks to see cases decrease. We understand that new restrictions may have an economic

impact on businesses, but the economic impact of rising infections will be equally – or more - damaging. Controlling the spread of COVID-19 will ultimately lead to improved economic outcomes as we adapt to the virus and learn to conduct business safely. Furthermore, unless we can get control of this epidemic and once again begin to see a decrease in cases we will not be able to safely send our children to school in the Fall which will have long lasting repercussions on their education, health, and well-being.

You acknowledged that you are dealing with political considerations, but we urge you to rise above the political to make the health and safety of our citizens your foremost concern. Successful control of the virus will be your biggest political victory.

Thank you for your thoughtful consideration of this urgent matter.

Jesse Couk, MD  
Chair of Infectious Diseases, Shepherd Center  
Assistant Director of Infection Control, Piedmont Atlanta Hospital

Sophie Lukashok, MD  
President, Infectious Diseases Society of Georgia

Carlos del Rio, MD  
Distinguished Professor for Emory Clinical and Academic Affairs at Grady  
Executive Associate Dean for Emory at Grady  
Emory University School of Medicine  
Professor of Global Health and Epidemiology  
Rollins School of Public Health

Melanie Thompson, MD  
Principal Investigator, AIDS Research Consortium of Atlanta

On behalf of over 1400 healthcare workers of Georgia, signatures attached.
